

National Chrysanthemum Society

Project 2020 - Gentech Update

Dear Member,

You will read in the Year Book that in line with the 2019 Trustee's Report, the Management & Executive have launched a full review of the Society's future, and under Project 2020 adopted four workstreams to protect and enhance the Society.

The Affordability workstream is the most advanced and aims to half the annual financial deficit for 2021 and beyond, as such matters are moving at a pace. We have looked closely at the costs and membership uptake of the Gentech Project and recently decided to bring NCS funding to a halt.

Accordingly, the following six cultivars only will be supported until the end of March 2021, please note that availability will be limited, so please order early.

- John Wingfield
- Pink John Wingfield
- Salmon John Wingfield
- Millennium
- Rita Fox
- Kay Woolman

The cost of Gentech treated stock:-

£3.50 per plant, plus £10 Special Delivery postal service

Please send orders with cheque payable to the National Chrysanthemum Society to:-

Dr Graham Barclay
4 The Lane, Mursley, Milton Keynes
Buckinghamshire, MK17 0RY
